United States

RE: Claim Validation Results

Many companies have been self-certifying their claims based on their own internal reviews. Because some manufacturers have provided misleading information, consumers and retailers are beginning to ask for independent proof of these claims. Even when companies have independent third-party verification of specific claims, the claims can still be misleading and subject to greenwashing charges if the claims are not relevant or meaningful.

Sellars Wipers and Sorbents, Inc. (Sellars) produces a high-performance based line of double recycled wipers, GREENX™ Towels (as listed on page 2 of this letter), that contain post-consumer recycled fibers. Sellars is interested in promoting this fact, but also wants to provide the assurance that any environmental claims being made are accurate. In this regard, Sellars engaged TerraVeritas Validation Sciences Inc. to substantiate the Claim regarding post-consumer recycled fibers, to ensure its accuracy, and to avoid the potential for perceived 'greenwashing'.

The TerraChoice Group is a family of companies with expertise in environmental standard setting, verification, and marketing. TerraVeritas, a wholly-owned subsidiary of TerraChoice, combines science-based environmental information with marketing savvy to provide enhanced environmental credibility for companies.

TerraVeritas performed the following activities for this claims validation process:

- Examined the calculations, supporting data, and standard operating procedures in order to specifically assess the internal logic, conservativeness and accuracy of the calculations; the applicability and veracity of the underlying assumptions and data; and the impact uncertainty in the calculations, data quality and use of the Claim;
- Assessed whether the post-consumer recycled fiber claim was related to materially important areas of environmental impact; and
- Determined if the Claim met or exceeded both the requirements and the intention of the Federal Trade Commission's "Guides for the Use of Environmental Marketing Claims".

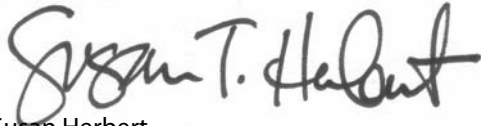

TerraVeritas has successfully verified the following claim language for the products listed on page two of this letter manufactured at the Sellars facility in Milwaukee, Wisconsin¹:

"made with 40% post-consumer recycled fiber*
****(based only on the product's fiber content, which represents a minimum of 85% of the total product weight)"***

¹ It should be noted that TerraVeritas has performed this validation process on the specific GREENX™ Towels identified on page two of this letter (together referred to as the 'Product') in order to determine whether or not the Product meets the claim of "made with 40% post-consumer recycled fiber" (referred to as the 'Claim'). Our review of the Product is limited to the accuracy of the Claim and we have not reviewed, nor have we provided an opinion on any other product or, including but not limited to, whether or not the Product is environmentally friendly.

We commend Sellars Wipers and Sorbents, Inc. for taking a leadership role in presenting accurate and validated environmental information to consumers.

Sincerely,

Susan Herbert
Vice President, Science Strategy

Listed below are the specific products for which the Claim [*“made with 40% post-consumer recycled fiber* * (based only on the product’s fiber content, which represents a minimum of 85% of the total product weight)”*] was validated. These products are identified by product name and product number, and are produced at the Sellars’ Milwaukee, Wisconsin manufacturing facility. These are the only products against which the Claim was validated.

Product Name	Product Number	UPC	Sheet Size	Description
GREENX™ Light-Duty Natural DRC Quarter Fold Towels (LW Natural 1/4 Fold)	20109	N/A	12.5" x 13"	90 sheets/bundle 12 bundles/case
