

Spill Kits

Indispensable emergency response tools to clean and contain spills of all sizes

Spill Kits are an indispensable emergency response tool for cleaning up and containing spills of all sizes. Each spill kit is designed to handle a particular sized spill. The sorbent materials inside of the spill kits are kept clean and dry until they are needed by durable, quality bags and drums. The packaging has all been designed for quick and easy access to sorbent contents inside. Spills happen and spill kits are great insurance that the spills will be contained and cleaned up in a timely and efficient manner.
