

# Mayfair®

## Motion Activated Roll Towel Dispenser

- Allows for easy but also extremely sanitary dispensing as users do not have to touch any part of the dispenser to get their towels
- Can be set in two operating modes, sensor and towel out. Sensor mode waits for a hand to be placed underneath before it dispenses paper. In towel out mode paper is always available and there is no wait between dispensing.
- Program to dispense at a 0, 1.5 or 3 second delay, or choose the no delay setting for higher traffic areas
- Adjust your paper length as needed (8", 12", 16")
- Self-adjusting sensing mode
- Uses 4 D-cell alkaline batteries
- Made from durable, impact-resistant plastic
- Compatible with our MAYFAIR® 350', 425', 600', and 800' hard wound roll towels as well as most standard hard wound roll towels

Inside view of dispenser

## Towel & Tissue
