* per ASTM F726-06

Absorbents

Light-Duty Absorbent Split Rolls

Made in the USA

- Made with 70% recycled cellulose fibers
- EverSoak® Light-Duty Absorbent Split Rolls soak up both oil and water as well as grease, transmission fluid, hydraulic fluid, coolants, diesel fuel and many other fluids
- Perforated every 19" across but not down the middle of the center of the rolls
- Coverstock is only on the top side of the sorbent roll to allow roll to instantly begin soaking up liquid, keeping the roll firmly in one place and still having the durability that customers have come to expect from the Eversoak® line of absorbents
- Ash content is 1.8% per ASTM D5468
- 9,592 BTU/lb per ASTM D5468
- More absorbent and a more cost effective alternative than the leading competitor's meltblown sorbent split rolls
- Class A fire retardant when roll is dry (lab tested per ASTM E84)
- Helps you comply with 29 CFR 1910.22(a)(2)

Caution: Not intended for use with aggressive acids or caustics. Dispose of all sorbent materials in accordance with local, state and federal regulations.

General Purpose Absorbents

EverSoak® is a truly innovative green sorbent product with a general purpose line that is made with 70% recycled fibers. EverSoak® is up to twice as absorbent as the leading competitors' meltblown sorbents, according to independent lab tests, which helps reduce usage.

Sellars uses recycled cellulose fibers to produce the General Purpose EverSoak® products. Unlike any other sorbent manufacturer, Sellars is also a manufacturer of a full line of very popular DRC shop towels. This gives us a strategic advantage because we are able to use the waste from producing our high quality industrial wipers as the major raw material source for our general purpose EverSoak® products. Since the major source of raw material is generated internally, we are not forced to purchase random and inconsistent waste material on the open market for our general purpose sorbent products.
