## Medium-Duty 8' Absorbent Socks

**Made in the USA**

- Made with 70% recycled cellulose fibers
- EverSoak® Medium-Duty Absorbent Socks soak up both oil and water as well as diesel fuel, grease, transmission fluid, hydraulic fluid, coolants and many other fluids
- Provide great moldability allowing the sock to easily wrap around the base of a machine or the perimeter of a spill
- Ash content is 1.8% per ASTM D482
- 9,611 BTU/lb per ASTM D5468
- Helps prevent leaks, drips and spill from spreading, reducing the potential for slip and falls
- Class A fire retardant when sock is dry

*Caution: Not intended for use with aggressive acids or caustics. Dispose of all sorbent materials in accordance with local, state and federal regulations.*

## General Purpose Absorbents

EverSoak® is a truly innovative green sorbent product with a general purpose line that is made with 70% recycled fibers. EverSoak® is up to twice as absorbent as the leading competitors' meltblown sorbents, according to independent lab tests, which helps reduce usage.

Sellars uses recycled cellulose fibers to produce the General Purpose EverSoak® products. Unlike any other sorbent manufacturer, Sellars is also a manufacturer of a full line of very popular DRC shop towels. This gives us a strategic advantage because we are able to use the waste from producing our high quality industrial wipers as the major raw material source for our general purpose EverSoak® products. Since the major source of raw material is generated internally, we are not forced to purchase random and inconsistent waste material on the open market for our general purpose sorbent products.

 **Made in the U.S.A.**
