

## DuraSoak® Series Oil Only Econo-Duty Pads

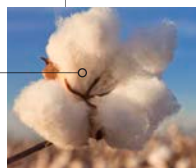

Made from a renewable resource.

### What's Inside:

DuraSoak™ Oil Only Absorbents are made with cotton fibers.

Absorbs up to 20.8 gallons of oil per bale\*

\* per ASTM F726-06

- Made with 85% cotton fibers
- Oil Only Cotton Absorbents are made with 85% cotton and are perfect for spill response as well as outdoor MRO (Maintenance, Repair & Operations) applications as they soak up hydrocarbon based spills but not water.
- Helps spill contractors working on government contracted sites meet requirements for using green products
- Pads are packaged in a clear poly bag which is put into a cardboard box for shipping/storage purposes

### The Sellars Difference: Cotton from the fields, not from textile/industrial waste

Cotton from the fields has natural oils that help repel water but absorbs oil based liquids so there are no chemicals that need to be applied to the fibers to make them hydrophobic. However, textile/industrial cotton waste no longer has the natural oils on the fibers and requires a special treatment applied to the fibers to make them hydrophobic (repel water).

- Ash content is 2.17% per ASTM D482
- 8,705 BTU/lb per ASTM D5468
- Helps you comply with 29 CFR 1910.22(a)(2)
- Patent Pending

*Caution: Not fire retardant. Not intended for use with aggressive acids or caustics. Dispose of all sorbent materials in accordance with local, state and federal regulations.*

# Oil Only Absorbents

Sellars uses cotton grown in the USA to produce the Oil Only TOOLBOX® DuraSoak® products. Cotton from the fields have natural oils that help repel water while absorbing oil-based liquids, so there are no chemicals that need to be applied to the fibers to make them hydrophobic. Sellars cotton absorbents are a proven performer and were used extensively in the Deep Water Horizon Oil Spill cleanup in the Gulf of Mexico in 2010.
